

# QUALIFICATION PACK – OCCUPATIONAL STANDARD FOR INFRASTRUCTURE EQUIPMENT SECTOR

# What are Occupational Standards(OS)?

- Solution OS describe what individuals need to do, know and understand in order to carry out a particular job role or function
- performance standards that individuals must achieve when carrying out functions in the workplace, together with specifications of the understanding

# Introduction

# **Qualification Pack - Mechanic (Engine)**

SECTOR: INFRASTRUCTUREEQUIPMENT

**SUB SECTOR:** Equipment service and spares

**OCCUPATION:** Equipment maintenance

**REFERENCE ID:** IES/Q1101

**ALIGNED TO:** NCO-2004/7233.24

**Brief Job Description:** The primary role of a Mechanic (Engine) is to provide assistance in engine related maintenance. Mechanic (Engine) supports the equipment operation by conducting inspections and preventive maintenance.

**Personal Attributes:** This job requires the individual to work independently as well as in teams. He should have analytical skills, problem solving attitude, high concentration levels, Mechanic Engine should have good hand-eye coordination, good eye-sight, no colour-blindness and should be able to complete precise and detailed work.

Job Role	Mechanic (Engine)		
Role Description	Mechanic (Engine) provides assistance in engine related maintenance and supports the equipment operation by conducting inspections and preventive maintenance		
NSQF level	4		
Minimum Educational Qualifications*	Preferably ITI/ Diploma in Diesel Engine Mechanic		
Maximum Educational Qualifications*	NA		
Training	Engine training preferred		
(Suggested but not mandatory)			
Experience	At least 2 years of experience in Engine maintenance		
Applicable National Occupational Standards (NOS)	1. IES/N1101Carry out repair and maintenance of the equipment'sengine 2. IES/N7701Carry out reporting and documentation 3. IES/N7602Comply with workshop health and safety guidelines  Optional:  N.A.		
Performance Criteria	As described in the relevant OS units		

# Qualification Pack For Mechanic (Engine)

Keywords /Terms	Description		
Sector	Sector is a conglomeration of different business operations having similar		
	businesses and interests. It may also be defined as a distinct subset of the		
	economy whose components share similar characteristics and interests.		
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics		
	and interests of its components.		
Vertical	Vertical may exist within a sub-sector representing different domain areas		
	or the client industries served by the industry.		
Occupation	Occupation is a set of job roles, which perform similar/related set of		
	functions in an industry.		
Function	Function is an activity necessary for achieving the key purpose of the sector,		
	occupation, or area of work, which can be carried out by a person or a		
	group of persons. Functions are identified through functional analysis and		
	form the basis of OS.		
Sub-functions	Sub-functions are sub-activities essential to fulfil achieving the objectives of		
	the function.		
Job role	Job role defines a unique set of functions that together form a unique		
	employment opportunity in an organization.		
Occupational Standards	OS specify the standards of performance an individual must achieve when		
(OS)	carrying out a function in the workplace, together with the knowledge and		
	understanding; he/she needs to meet that standard consistently.		
	Occupational Standards are applicable both in the Indian and global		
	contexts.		
Performance Criteria	Performance Criteria are statements that together specify the standard of		
	performance required when carrying out a task.		
National Occupational	NOS are Occupational Standards which apply uniquely in the Indian context.		
Standards (NOS)			
Qualifications Pack Code	Qualifications Pack Code is a unique reference code that identifies a		
	qualifications pack.		
Qualifications Pack(QP)	Qualifications Pack comprises the set of OS, together with the educational,		
	training and other criteria required to perform a job role. A Qualifications		
	Pack is assigned a unique qualification pack code.		
Unit Code	Unit Code is a unique identifier for an Occupational Standard, which is		
	denoted by an 'N'.		
Unit Title	Unit Title gives a clear overall statement about what the incumbent should		
	be able to do.		
Description	Description gives a short summary of the unit content. This would be		
	helpful to anyone searching on a database to find the required one.		
Scope	Scope is the set of statements specifying the range of variables that an		
	individual may have to deal with in carrying out the function which have a		
	critical impact on the quality of required performance.		
Knowledge and	Knowledge and Understanding are statements which together specify the		
Understanding	technical, generic, professional and organizational specific knowledge that		
	an individual needs in order to perform up to the required standard.

Carry out repair and maintenance of the equipment's engine

# National Occupational Standard

# **Overview**

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Ability for activities that need to be carried out for testing, diagnosing, repairing and maintaining engines.

# **National Occupational Standards**

# IES/N1101 Carry out repair and maintenance of the equipment's engine

Unit Code	IES/N1101			
Unit Title (Task)	Carry out repair and maintenance of the equipment's engine			
Description	This unit provides Performance Criteria, Knowledge & Understanding and Skills			
Description	,			
	& Ability for activities that need to be carried out for testing, diagnosing,			
_	repairing and maintaining engines.			
Scope	This unit/task covers the following:			
	Breakdown Repair			
	Maintenance Work			
Performance Criteria(Po	C) w.r.t. the Scope			
Element	Performance Criteria			
Breakdown repair	To be competent, the user/individual on the job must be able to:			
	PC1. Collect information on the symptoms and problems associated with			
	fault			
	PC2. Check oil levels of engine, transmission and radiant coolant are as per			
	manufacturer's indicators			
	PC3. Select appropriate diagnostic techniques, tools and aids to locate the			
	fault			
	PC4. Apply appropriate diagnostic techniques, tools and aids to locate the			
	fault			
	PC5. Inspect the work area is free from hazards as per the safety norm of the			
	organization			
	PC6. Inspect the work area and check for the cleanliness and as per the			
	organizational standards			
	PC7. Carry out random checks and inspections to keep a check on the quality			
	of work carried out			
	PC8. Investigate and establish the most likely causes of the fault as per the			
	Standard Operating Plan			
	PC9. Remove, replace or repair the required components, using approved			
	tools and techniques as per the manufacturer's manual			
	PC10. Ensure to remove, replace or repair the required components without			
	· · · · · · · · · · · · · · · · · · ·			
	causing damage to components or surrounding structure			
	PC11. Report any instances where the removal and replacement activities			
	cannot be fully met as per company's policy			
	PC12. Complete the relevant documentation, in accordance with			
	organizational requirements			
	PC13. Work safely at all times, complying with health and safety and other			
	relevant regulations, directives and guidelines			
	PC14. Handle and dispose waste based on environmental guidelines at the			
	work place			
Maintenance work	PC15. Follow the maintenance schedule as per the manufacturer's manual			
	PC16. replace or repair the engine parts as per the schedule			
	PC17. Verify in appropriate sequence, for the engine, as per service manual,			
	the following:			
	<ul> <li>leakage from parts</li> </ul>			
	<ul> <li>breakage of parts</li> </ul>			

IES/N1101 Carr	y out repair and maintenance of the equipment'sengine		
unusual noise			
	under-rated performance		
	PC18. Check the engine indication & Fuel circulation as per service manual		
	PC19. Check and clean Air Filter as per as per service manual		
	PC20. Conduct Crank Test to test the lubrication as per engine specification		
	PC21. Ensure Engine oil and coolant level are as per indicator		
	PC22. Ensure water separator as per manufacturer's manual		
	PC23. Ensure that water is drained, if, accumulated in the separator		
	PC24. Report any instances where the parts need to be changed/repaired as		
	per organization policy		
	PC25. Replenish / change the consumables as per the manufacturer's manual		
	PC26. Change/Repair the defective part(s) as per manufacturer's manual		
	PC27. Complete the relevant documentation, in accordance with		
·	organizational requirements		
Knowledge and Unders			
A. Organizational	The user/individual on the job needs to know and understand:		
Context	KA1. The organization's procedures and guidelines related to Breakdown &		
(Knowledge of the	Maintenance services		
company /	KA2. The performance standards & procedures followed in the company		
organization and	KA3. Reporting structure in the company		
its processes)	KA4. Escalation matrix for reporting unresolved problems		
	KA5. Timeframe in which the complaint/problem should be resolved		
	KA6. Work target and review mechanism with supervisor for obtaining,		
	giving feedback related to performance process		
	KA7. Location of tools		
	KA8. Contact person in case of queries on procedure or products		
	KA9. Location and process for storage and disposal of waste material		
	KA10. Safety Policy of the company		
B. Technical	The user/individual on the job needs to know and understand:		
Knowledge	KB1. The method to extract and use information from the relevant areas to		
	assist in the diagnosis		
	KB2. Techniques to rectify the fault in the engine of the infrastructure		
	equipment		
	KB3. The manufacturer's specification of the engine in use		
	KB4. Techniques used to diagnose the faults (such as sensory information -		
	sight, sound, smell, touch;, aural, visual and functional checks, taking		
	measurements and use of equipment self-diagnostics) in the engine		
	KB5. Usage of various fault diagnostic equipment to investigate the problem		
	in the engine(such as Multimeter, pressure gauges, thermal measuring		
	equipment)		
	KB6. Procedure to remove components from engine system without damage		
	to the components or surrounding structure		
	KB7. The specification and grades of lubricants		
	KB8. The method to identify which lubricant to use n which equipment		
	KB9. Usage of a various hand tools (such as spanners, sockets, screwdrivers,		
	pliers, torque wrenches)		

IES/N1101	Carry out repair and m	aintenance of the equipment'sengine
-----------	------------------------	-------------------------------------

- KB10. Methods to check that the tools and equipment to be used are correctly calibrated, and are in a safe, tested and serviceable condition
- KB11. Method to use all tools correctly, check and store after use
- KB12. Technique to lay the removed components out in a logical sequence to aid re-assembly,
- KB13. Methods to keep component parts together or in the order that they were removed
- KB14. Techniques of inspecting removed components of engine,
- KB15. Technique to check for damage and wear in engine
- KB16. the equipment used in the rectification operations (such as alignment tools, torque wrenches, presses)
- KB17. Methods to rectify the fault using methods such as component replacement, adjustments, repair and refitting techniques
- KB18. Ensure that all sealants and lubricants used are of the correct specification for the vehicle
- KB19. Technique to carry out visual, aural, functional and measurement tests
- KB20. Ensure the correct operation of the component or system
- KB21. The expected outcomes of the tests being conducted
- KB22. Problems with the diagnosis and rectification operations,
- KB23. Process of informing appropriate people of non-conformances
- KB24. Techniques to clean/service different parts of engine
- KB25. different jigs and fixtures used
- KB26. Method to fill different reports/templates followed in the organization
- KB27. The hazards associated with diagnosing and rectifying engine faults
- KB28. Usage of proper tools and equipment used and minimize & reduce any risk

### Skills (S)

# A. Core Skills / Generic Skills

### **Writing Skills**

The user/individual on the job needs to know and understand how to:

- SA1. Record and document the details of repairs and maintenance performed on various components
- SA2. Record all diagnostics as per the prescribed format recommended by the manufacturer

### **Reading Skills**

The user/individual on the job needs to know and understand how to:

- SA3. Refer to operator and maintenance manuals, parts checklist and other equipment related collateral to support work tasks
- SA4. Read the specifications of an equipment or any other component or part

# **Oral Communication (Listening and Speaking Skills)**

The user/individual on the job needs to know and understand how to:

- SA5. Interact with the customers, as required, to seek clarifications and understand issues
- SA6. Use correct technical terms while communicating with team members and customers
- SA7. interact with team members including colleagues to work efficiently

# IES/N1101 Carry out repair and maintenance of the equipment's engine

B. Professional Skills	Decision Making		
	The user/ individual on the job needs to know and understand how to:		
	SB1. Evaluate the situation to decide on seeking assistance from manager/		
	peers		
	SB2. Decide on the repair/ replacement of any aggregate or component post		
	the diagnosis		
	Plan and Organize		
	The user/ individual on the job needs to know and understand how to:		
	SB3. Plan, prioritize and sequence work operations as per required schedule		
	and location		
	SB4. Organize and analyze information relevant to work		
	Customer Centricity		
	The user/ individual on the job needs to know and understand how to:		
	SB5. Ensure that the service provided is of the highest order to ensure		
	customer satisfaction		
	SB6. Follow up with the superiors on any unfavourable feedback received from customer		
	SB7. Ensure timely communication of the additional requirements in the		
	equipment to the customer		
	Problem Solving		
	The user/ individual on the job needs to know and understand how to:		
	SB8. Refer problems outside area of responsibility to appropriate person		
	SB9. Determine problems in the equipment needing priority action		
	SB10. Refer complex diagnosis to supervisor/ other peers		
	Analytical Thinking		
	The user/ individual on the job needs to know and understand how to:		
	SB11. Assess repairs required based on technical faults identified		
	Critical Thinking		
	The user/ individual on the job needs to know and understand how to:		
	SB12. Analyse, evaluate and apply the information gathered from observation,		
	experience, reasoning to act efficiently and effectively		
	SB13. Use the diagnosis results to take an appropriate decision on repair or		
	replacement of component with consultation with manager/ peers

# Nomenclature for QP and NOS units

The following acronyms/codes have been used in the nomenclature above:

Sub-sector	Range of Occupation numbers
<b>Equipment Operations</b>	1 to 10
Equipment Service and spares	11 to 20
<b>Equipment Production</b>	21 to 40
Equipment Sales	41 to 50
<b>Equipment Financing</b>	51 to 55
Core Enablers	56 to 65
Other Enablers	66 to 75
Common Occupations	76 to 85

Sequence	Description	Example
Three letters	Industry name	IES
Slash	/	/
Next letter	Whether <b>Q</b> P or <b>N</b> OS	N
Next two numbers	Occupation code	01
Next two numbers	OS number	01

# **CRITERIA FOR ASSESSMENT OF TRAINEES**

Job Role Mechanic (Engine)

# Qualification Pack IES/Q1101

Sector Skill Council Infrastructure Equipment

# **Guidelines for Assessment**

- 1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC
- 2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC
- 3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below)
- 4. Individual assessment agencies will create unique evaulations for skill practical for every student at each examination/training center based on this criteria
- $5.\ To\ pass\ the\ Qualification\ Pack$  , every trainee should score a minimum of 50% aggregate
- 6. In case of successfully passing only certain number of NOS's, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack

					llocation
NOS	Performance Criteria	Total Mark	Out Of	Theory	Practical
1. IES/N1101 Carry out repair and maintenance of the equipment's engine	PC1. Collect information on the symptoms and problems associated with fault		1	0	1
	PC2. Check oil levels of engine, transmission and radiant coolant are as per manufacturer's indicators		1	0	1
	PC3. Select appropriate diagnostic techniques, tools and aids to locate the fault	46	1	0	1
	PC4. Apply appropriate diagnostic techniques, tools and aids to locate the fault		1	0	1
	PC5. Inspect the work area is free from hazards as per the safety norm of the organization		1	0	1
	PC6. Inspect the work area and check for the cleanliness and as per the organizational standards		2	1	1

# Qualifications Pack ForMechanic (Engine)

PC7. Carry out random checks and inspections to keep a check on the quality of work carried out	1	0	1
PC8. Investigate and establish the most likely causes of the fault as per the Standard Operating Plan	1	0	1
PC9. Remove, replace or repair the required components, using approved tools and techniques as per the manufacturer's manual	1	0	1
PC10. Ensure to remove, replace or repair the required components without causing damage to components or surrounding structure	1	0	1
PC11. Report any instances where the removal and replacement activities cannot be fully met as per company's policy	4	1	3
PC12. Complete the relevant documentation, in accordance with organizational requirements	2	1	1
PC13. Work safely at all times, complying with health and safety and other relevant regulations, directives and guidelines	1	0	1
PC14. Handle and dispose waste based on environmental guidelines at the work place	2	1	1
PC15. Follow the maintenance schedule as per the manufacturer's manual	1	0	1
PC16. replace or repair the engine parts as per the schedule	2	1	1
PC17. Verify in appropriate sequence, for the engine, as per service manual, the following:  • leakage from parts  • breakage of parts  • unusual noise  • under-rated performance	4	1	3
PC18. Check the engine indication & Fuel circulation as per service manual	2	1	1
PC19. Check and clean Air Filter as per as per service manual	1	0	1
PC20. Conduct Crank Test to test the lubrication as per engine specification	3	0	3
PC21. Ensure Engine oil and coolant level are as per indicator	2	1	1
