Qualification Pack

IES/Q0125: Junior Borewell Drill Machine Operator

Brief Job Description

A junior bore well drilling machine operator assists in setting up and guiding the operator in operating portable drilling rig to drill wells. He helps in starting and controlling the drilling actions by assisting in lowering of well casing into the well bore.

Personal Attributes

The job requires an individual to be physically agile, strong and have good eye sight. He should maintain constant alertness to the multiple concurrent activities during drilling operations. He should possess basic numerical skills and is required to be mentally alert at all times.

Applicable National Occupational Standards (NOS)

Compulsory NOS:

1. [IES/N0173: Assist in carrying out pre-operation checks on bore well drilling equipment](#)
2. [IES/N0174: Assist in bore well drilling operations](#)
3. [IES/N0175: Assist in regular maintenance of the bore well drilling equipment](#)
4. [IES/N7601: Comply with worksite health and safety guidelines](#)

Qualification Pack

IES/N0173: Assist in carrying out pre-operation checks on bore well drilling equipment

Description

This unit provides insight into activities that are required for assisting in conducting pre-checks on the bore well machine before starting the operations

Scope

This unit/task covers the following:

- Pre-operation checks
- Reporting and documentation

Elements and Performance Criteria

Pre-operation checks

To be competent, the user/individual on the job must be able to:

- PC1.** check for tires-damages and bulges and report to the operator/ supervisor
- PC2.** check for wheels, loose lug bolts, bent rims, cracks as per instructions from the operator/ supervisor
- PC3.** tightening of bolts as per the instructions from the operator/ supervisor
- PC4.** assist operator in checking fluid levels of engine crank case, radiator coolant and battery electrolyte
- PC5.** check for drill rods availability as per the drilling requirements or as per instructions from the operator
- PC6.** check for the diesel availability and if needed, report to the operator
- PC7.** operate jacks to level the vehicle if needed use wooden jacks as per the instructions from the operator
- PC8.** tighten all the pipes, valves and bolts before running the machine as per operators instructions
- PC9.** connect the oil pipe to the main machine (which contains rig mast) that is used for hammer lubrication as directed by the operator
- PC10.** check the availability of tools required to maintain the machine
- PC11.** assist the operator in servicing the hammer before connecting it to the mast
- PC12.** polish the drill bit for better drilling as per instructions from the operator
- PC13.** assist in cleaning the area to level the surface for performing drilling

Reporting and documentation

To be competent, the user/individual on the job must be able to:

- PC14.** report defects precisely to the operator/ supervisor if beyond scope of the role
- PC15.** assist in maintaining a checking/maintenance logbook to record all activities performed before starting the paver operation

Qualification Pack

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organization operations, maintenance and safety related guidelines
- KU2.** the operational standards & procedures followed in the company in timeframe in which the complaint/problem should be resolved
- KU3.** reporting structure of the company
- KU4.** location of specialized tools and the equipment
- KU5.** location and process for storage and disposal of waste material
- KU6.** overview of types of bore well drilling machine and the general applications with respect to each machine
- KU7.** technical specifications, features and performance of different types of bore well drilling machines
- KU8.** components of Drilling machine and its functioning
- KU9.** basics of engine and sub systems; fuel, lubrication and cooling systems
- KU10.** basics of transmission, auto-electrical functioning and repairs
- KU11.** different types of hydraulic mechanisms, and principles of friction
- KU12.** basics of electrical systems including control panel
- KU13.** controls, levers and switches in order to assist in operating the bore well drilling machine
- KU14.** procedure of topping up fuel, lube oil and coolant in the machine
- KU15.** optimal working parameters- engine oil pressure, hydraulic oil pressure and temperatures
- KU16.** manufacturer's specifications for tools and supplies

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record information/observations on activities/incidents as per the prescribed norms
- GS2.** read and comprehend basic signs, symbols, diagrams, charts and decals on the equipment & at work site
- GS3.** read and understand the applicable relevant aspects of the equipment operation & maintenance manuals
- GS4.** use correct technical terms/phrases while interacting with other coworkers & supervisor
- GS5.** explain/instruct other team members effectively in a clear and concise manner
- GS6.** listen attentively and understand the queries /comments raised by other team members
- GS7.** decide when to escalate and seek assistance if the problem is beyond scope
- GS8.** prioritize and schedule maintenance activity on equipment to support operational needs
- GS9.** plan and organise the work schedule in coordination with other team members & supervisor
- GS10.** execute the tasks efficiently within the time frame allotted and prescribed quality norms; with minimal supervision
- GS11.** ensure quality service is delivered as committed to achieve high levels of customer satisfaction

Qualification Pack

- GS12.** evaluate the possible solutions and initiate appropriate remedial measures and actions
- GS13.** apply common sense and reasoning skills to identify the cause of delays and difficulties in execution
- GS14.** apply knowledge and judgement acquired through experience and awareness to execute tasks efficiently

IES/N0174: Assist in bore well drilling operations

Description

This unit provides Performance Criteria, Knowledge & Understanding and Skills & Ability for activities that are required to assist in operating of bore well drilling equipment

Scope

This unit/task covers the following:

- Bore well drilling operations
- Reporting and documentations

Elements and Performance Criteria

Bore well drilling operations

To be competent, the user/individual on the job must be able to:

- PC1.** pick up required material or equipment from storage and place them near the drilling area
- PC2.** grease the drill rods as per the instructions from the operator/ supervisor
- PC3.** assist the operator in placing casing pipe and connecting drill rods to the rotate motor
- PC4.** assist the operator in monitoring RPM, air discharge temperature and pressure, engine water temperature and pressure and sump pressure displayed in the compressor unit
- PC5.** check the engine oil regularly in two machines i.e. main truck and the supporting truck
- PC6.** assist the operator in adding fluids, coolants and fuel into the equipment
- PC7.** monitor the drilling operation when the operator is not around the equipment
- PC8.** clean the area regularly while drilling is in process as per instructions from the operator/ supervisor
- PC9.** place the tools and other parts at its place when drilling is completed

Reporting and documentation

To be competent, the user/individual on the job must be able to:

- PC10.** assist the operator in recording the drilling process as per the organization standards

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organization operations, maintenance and safety related guidelines
- KU2.** the operational standards & procedures followed in the company in timeframe in which the complaint/problem should be resolved
- KU3.** reporting structure of the company
- KU4.** location of specialized tools and the equipment
- KU5.** location and process for storage and disposal of waste material
- KU6.** contact person/area in case of emergency

Qualification Pack

- KU7.** technical specifications, features and performance of different types of bore well drilling machines
- KU8.** factors that affect equipment stability, such as ground and supporting condition
- KU9.** controls, levers and switches in order to assist operator in bore well drilling operations
- KU10.** actual and potential hazards, such as overhead utilities and guide wires, other equipment, personnel and vehicular traffic
- KU11.** safety controls and equipment such as emergency stop switches and fire extinguishers
- KU12.** safety measures to be followed at time of emergencies to avoid damage
- KU13.** roles of personnel on site such as operator, supervisor and others

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record information/observations on activities/incidents as per the prescribed norms
- GS2.** read and comprehend basic signs, symbols, diagrams, charts and decals on the equipment & at work site
- GS3.** read and understand the applicable relevant aspects of the equipment operation & maintenance manuals
- GS4.** use correct technical terms/phrases while interacting with other coworkers & supervisor
- GS5.** explain/instruct other team members effectively in a clear and concise manner
- GS6.** listen attentively and understand the queries /comments raised by other team members
- GS7.** decide when to escalate and seek assistance if the problem is beyond scope
- GS8.** prioritize and schedule maintenance activity on equipment to support operational needs
- GS9.** plan and organise the work schedule in coordination with other team members & supervisor
- GS10.** execute the tasks efficiently within the time frame allotted and prescribed quality norms; with minimal supervision
- GS11.** ensure quality service is delivered as committed to achieve high levels of customer satisfaction
- GS12.** evaluate the possible solutions and initiate appropriate remedial measures and actions
- GS13.** apply common sense and reasoning skills to identify the cause of delays and difficulties in execution
- GS14.** apply knowledge and judgement acquired through experience and awareness to execute tasks efficiently

IES/N0175: Assist in regular maintenance of the bore well drilling equipment

Description

This unit provides an insight into activities that are required for performing routine maintenance and troubleshooting of the bore well drilling equipment

Scope

This unit/task covers the following:

- Routine maintenance
- Repair and troubleshooting
- Documentation and reporting

Elements and Performance Criteria

Routine maintenance

To be competent, the user/individual on the job must be able to:

- PC1.** assist in checking fluid levels, coolant, oils and topping
- PC2.** check the battery level and condition of the terminals as per instructions from the operator
- PC3.** assist the operator in repairing and maintenance of the equipment
- PC4.** assist the operator in monitoring RPM, air discharge temperature and pressure, engine water temperature and pressure and sump pressure displayed in the compressor unit
- PC5.** ensure all the tools are kept in the designated place after usage
- PC6.** report defects precisely to the supervisor if beyond scope of his role

Repair and troubleshooting

To be competent, the user/individual on the job must be able to:

- PC7.** use appropriate tools while troubleshooting
- PC8.** assist operator in diagnosing problem and identifying appropriate repair procedures
- PC9.** dispose waste as per the guidelines of the site/ organization

Documentation and reporting

To be competent, the user/individual on the job must be able to:

- PC10.** follow reporting procedures as laid down by the employer
- PC11.** assist in completing all documentation in the prescribed standards in a timely manner
- PC12.** report defects precisely to the operator/ supervisor if beyond scope of his role

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** the organization operations, maintenance and safety related guidelines

Qualification Pack

- KU2.** the operational standards & procedures followed in the company in timeframe in which the complaint/problem should be resolved
- KU3.** reporting structure of the company
- KU4.** location of specialized tools and the equipment
- KU5.** location and process for storage and disposal of waste material
- KU6.** maintenance schedule of the equipment
- KU7.** basics of engine and sub systems; fuel, lubrication and cooling systems
- KU8.** basics of transmission, auto-electrical functioning and repairs
- KU9.** different types of hydraulic mechanisms, and principles of friction
- KU10.** basics of electrical systems including control panel
- KU11.** control and switches needed to operate the bore well drilling machine appropriately
- KU12.** common defects and general causes of breakdown
- KU13.** spill kit procedures

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** record information/observations on activities/incidents as per the prescribed norms
- GS2.** read and comprehend basic signs, symbols, diagrams, charts and decals on the equipment & at work site
- GS3.** read and understand the applicable relevant aspects of the equipment operation & maintenance manuals
- GS4.** use correct technical terms/phrases while interacting with other coworkers & supervisor

IES/N7601: Comply with worksite health and safety guidelines

Description

This unit is about adhering to health and safety requirements at the worksite during equipment operations.

Scope

This unit/task covers the following: Worksite health and safety

Elements and Performance Criteria

Worksite health and safety

To be competent, the user/individual on the job must be able to:

- PC1.** comply with safety, health, security and environment related regulations/ guidelines at the work site
- PC2.** use personal protective equipment (ppe) and other safety gear such as seat belt, body protection, respiratory protection, eye protection, ear protection and hand protection
- PC3.** follow safety measures during operations to ensure that the health and safety of self or others (including members of the public) is not at risk
- PC4.** carry out operations as per the manufacturers and worksite related health and safety guidelines
- PC5.** handle the transport, storage and disposal of hazardous materials and waste in compliance with worksite health, safety and environmental guidelines
- PC6.** follow safety regulations and procedures with regard to worksite hazards and risks
- PC7.** operate various grades of fire extinguishers, as applicable
- PC8.** support in administering basic first aid and report to concerned team members, as required, in case of an accident
- PC9.** respond promptly and appropriately to an accident/ incident or emergency situation, within limits of your role and responsibility

Knowledge and Understanding (KU)

The individual on the job needs to know and understand:

- KU1.** health, safety, environmental (hse) and security related policies/ guidelines of the organization and the worksite
- KU2.** the importance of complying with health, safety, environmental and security guidelines at the worksite and during operations
- KU3.** contact details of personnel responsible for health, safety and environment (hse) related matters
- KU4.** location of worksite storage, site team and safe assembly points
- KU5.** concerned personnel to reach out in case of emergencies and accidents/ incidents
- KU6.** reporting and documentation procedures for hse and security matters
- KU7.** manufacturers guidelines related to health and safety requirements

Qualification Pack

- KU8.** common types of health, safety, environment and security risks related to the worksite and operations
- KU9.** types, use and importance of personal protective equipment (ppe) and other safety gear
- KU10.** safe working practices to avoid common hazards and risks
- KU11.** guidelines for transport, storage and disposal of hazardous materials and waste
- KU12.** types of common hazards and risks at the worksite including fire, electrical, gas emergencies, accidents, incidents, structure collapse, machine breakdown
- KU13.** knowledge of safe lockdown/ stop of machinery use in case of emergencies and incidents/ accidents
- KU14.** types of fire extinguishers and their use
- KU15.** common injuries and appropriate basic first aid treatment eg. electrical shock, bleeding, wounds, fractures, minor burns, eye injuries

Generic Skills (GS)

User/individual on the job needs to know how to:

- GS1.** document and report any health and safety related incidents/ accidents
- GS2.** read and comprehend basic english to read manuals of operations
- GS3.** read all organizational and equipment related health and safety manuals and documents
- GS4.** read instructions, guidelines/procedures/rules related to the worksite and equipment operations
- GS5.** give clear instructions to co-workers, subordinates and other personnel
- GS6.** use correct technical terms while interacting with supervisor
- GS7.** make an appropriate timely decision in responding to emergencies/accidents in line with organizational/ worksite guidelines
- GS8.** use correct ppe and other safety gear while at the worksite
- GS9.** work with supervisors/ team mates to carry out work related tasks
- GS10.** plan work according to the required schedule and location
- GS11.** build and maintain positive and effective relationships with colleagues and customers
- GS12.** seek appropriate assistance from other sources to resolve problems
- GS13.** assess the intensity of the fire accident and operate fire extinguishers
- GS14.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently
- GS15.** document and report any health and safety related incidents/ accidents
- GS16.** read and comprehend basic english to read manuals of operations
- GS17.** read all organizational and equipment related health and safety manuals and documents
- GS18.** read instructions, guidelines/procedures/rules related to the worksite and equipment operations
- GS19.** give clear instructions to co-workers, subordinates and other personnel
- GS20.** use correct technical terms while interacting with supervisor
- GS21.** make an appropriate timely decision in responding to emergencies/accidents in line with organizational/ worksite guidelines

Qualification Pack

- GS22.** use correct ppe and other safety gear while at the worksite
- GS23.** work with supervisors/ team mates to carry out work related tasks
- GS24.** plan work according to the required schedule and location
- GS25.** build and maintain positive and effective relationships with colleagues and customers
- GS26.** seek appropriate assistance from other sources to resolve problems
- GS27.** assess the intensity of the fire accident and operate fire extinguishers
- GS28.** analyse, evaluate and apply the information gathered from observation, experience, reasoning, or communication to act efficiently

Assessment Guidelines and Assessment Weightage

Assessment Guidelines

1. Criteria for assessment for each Qualification Pack will be created by the Sector Skill Council. Each Performance Criteria (PC) (PC) will be assigned marks proportional to its importance in NOS. SSC will also lay down proportion of marks for Theory and Skills Practical for each PC.
2. The assessment for the theory part will be based on knowledge bank of questions created by the SSC.
3. Individual assessment agencies will create unique question papers for theory part for each candidate at each examination/training center (as per assessment criteria below).
4. Individual assessment agencies will create unique evaluations for skill practical for every student at each examination/ training center based on these criteria.
5. In case of successfully passing only certain number of NOSs, the trainee is eligible to take subsequent assessment on the balance NOS's to pass the Qualification Pack.
6. In case of unsuccessful completion, the trainee may seek reassessment on the Qualification Pack

Recommended Pass % : 70

Glossary

Sector	Sector is a conglomeration of different business operations having similar business and interests. It may also be defined as a distinct subset of the economy whose components share similar characteristics and interests.
Sub-sector	Sub-sector is derived from a further breakdown based on the characteristics and interests of its components.
Occupation	Occupation is a set of job roles, which perform similar/ related set of functions in an industry.
Job role	Job role defines a unique set of functions that together form a unique employment opportunity in an organisation.
Occupational Standards (OS)	OS specify the standards of performance an individual must achieve when carrying out a function in the workplace, together with the Knowledge and Understanding (KU) they need to meet that standard consistently. Occupational Standards are applicable both in the Indian and global contexts.
Performance Criteria (PC)	Performance Criteria (PC) are statements that together specify the standard of performance required when carrying out a task.
National Occupational Standards (NOS)	NOS are occupational standards which apply uniquely in the Indian context.
Qualifications Pack (QP)	QP comprises the set of OS, together with the educational, training and other criteria required to perform a job role. A QP is assigned a unique qualifications pack code.
Unit Code	Unit code is a unique identifier for an Occupational Standard, which is denoted by an 'N'
Unit Title	Unit title gives a clear overall statement about what the incumbent should be able to do.
Description	Description gives a short summary of the unit content. This would be helpful to anyone searching on a database to verify that this is the appropriate OS they are looking for.
Scope	Scope is a set of statements specifying the range of variables that an individual may have to deal with in carrying out the function which have a critical impact on quality of performance required.

Qualification Pack

Knowledge and Understanding (KU)	Knowledge and Understanding (KU) are statements which together specify the technical, generic, professional and organisational specific knowledge that an individual needs in order to perform to the required standard.
Organisational Context	Organisational context includes the way the organisation is structured and how it operates, including the extent of operative knowledge managers have of their relevant areas of responsibility.
Technical Knowledge	Technical knowledge is the specific knowledge needed to accomplish specific designated responsibilities.
Core Skills/ Generic Skills (GS)	Core skills or Generic Skills (GS) are a group of skills that are the key to learning and working in today's world. These skills are typically needed in any work environment in today's world. These skills are typically needed in any work environment. In the context of the OS, these include communication related skills that are applicable to most job roles.
Electives	Electives are NOS/set of NOS that are identified by the sector as contributive to specialization in a job role. There may be multiple electives within a QP for each specialized job role. Trainees must select at least one elective for the successful completion of a QP with Electives.
Options	Options are NOS/set of NOS that are identified by the sector as additional skills. There may be multiple options within a QP. It is not mandatory to select any of the options to complete a QP with Options.
